

ABSTRACT

Optical disc manufacturing sheet 1 comprising protective sheet 12 and curable adhesive layer 11 with a pre-curing storage elastic modulus of 10^3 to 10^6 Pa and a post-curing storage elastic modulus of 10^7 to 10^{11} Pa is laminated on reflective layer 3 formed on optical disc substrate 2. In the optical disc D1 obtained in this way, adhesive layer 11 has a uniform thickness and protective sheet 12 is resistant to pressure imprint.
